Worksheet 7 — Adding Fractions

Math, Grade 5 | Name: _____ | Date: _____

Rule 1 (same denominator): add the numerators and keep the denominator.

$$\frac{a}{c} + \frac{b}{c} = \frac{a+b}{c}$$

Rule 2 (different denominators): first rewrite the fractions with a common denominator, then use Rule 1.

$$\frac{1}{2} + \frac{1}{3} = \frac{3}{6} + \frac{2}{6} = \frac{5}{6}$$

Watch out! A common mistake is to add the denominators too: $\frac{1}{2} + \frac{1}{2}$ is not $\frac{2}{4}$. Half a pizza plus half a pizza is a whole pizza: $\frac{1}{2} + \frac{1}{2} = \frac{2}{2} = 1$.

← *remember the pizza!*

1. $\frac{2}{7} + \frac{3}{7} =$ _____

2. $\frac{1}{4} + \frac{1}{2} =$ _____

3. $\frac{2}{3} + \frac{1}{6} =$ _____

4. Dana ate $\frac{3}{8}$ of a cake and Yoni ate $\frac{1}{4}$. How much of the cake did they eat together? _____
